

HFO Safety Mile-Stone | Oct 19, 2011

http://wtbyler.com/press/hfo_safety_mile_stone

HOUSTON FUEL OIL TERMINAL COMPANY - WT Byler Co is pleased to announce celebration of a safety milestone at a very important project, celebrated with a very important customer.

CEO - Mr. Bill Wilson was on hand to personally thank the WT Byler Co project management team and crew. Mr. Wilson re-instated the importance of safety in the work-place... That everyone works and returns home to their family unharmed by practices performed on the project site.

The project history included the heavy / civil portion of Areas 15, 16, 19, 20, 21, and 22, Terminal Maintenance, Footings, Parking Lot (HMAC) and HFO North / South Terminal Projects.

Food service was ordered for one-hundred personnel to attend the event. The WT Byler Co Team had worked 175,000 man-hours without a lost-time injury.

About WT Byler Co

WT Byler Co is your heavy and civil engineering construction specialist dedicated to creating value for customers who depend on a turn-key solution with worry-free reliability. We are hands-on individuals and feel privileged to build the projects that we do... Major projects including infrastructure for mining, grass-root refineries, power plant & petroleum storage facilities, K-12 & institutes of higher education, major retail, professional sports arenas, manufacturing facilities, logistics distribution, road systems, airports, drainage structures, levees, railroads; even a pipe-spool base fabrication yard serving the increasing deep-water pipeline and steel-catenary market. We offer resources that are qualified, capable, responsive and committed to support any PMT in achieving its mission, goals and objectives.

To learn more or find out how to use WT Byler Co for your next project, contact Wendell Rychlik - Director of Business Development at wrychlik@wtbyler.com.
